

THE END OF THE WORLD.

Curiosity appears to have been excited to know something of the preaching and predictions of Mr. Miller, who was at last accounts lecturing to crowded congregations at Portland, Maine. He was previously preaching at the Malboro' Chapel, Boston, where he also had great crowds, and we are assured by a gentleman of that city, that people came from distant and neighboring towns to hear him.

It is stated in the Wesleyan Journal that Mr. Miller is about 60 years of age, a plain farmer from Hampton, in the state of New York. He is a member of the Baptist church in that place, from which he brings satisfactory testimonials of good standing, and a license to improve publicly. For about fourteen years he has been almost exclusively bent to the investigation of Scripture prophecies. The last eight years of his life have been devoted to lecturing on this favorite subject.

Mr. Miller's theory is, (it may satisfy the curious to learn) that in 1843 Christ will make his personal appearance on earth—the righteous dead shall be changed, and be called up to meet the Lord in the air. This is the first resurrection.—The bodies of the wicked, living and dead shall be consumed by fire in the general conflagration, which shall envelope the earth, and change and purify it for a suitable residence for the saints. They shall then descend as in New Jerusalem out of Heaven, and shall reign on earth with Christ a thousand years; at the end of which period, the bodies of the wicked shall be raised, and they shall be judged by the saints, and receive their sentence of endless banishment from the presence of the Lord and the glory of His power.

The intelligent readers will know that predictions upon the exact time when the world was to come to an end are nothing new. Hundreds of years ago men arose, preached the same thing, and had crowds to listen to them as Mr. Miller does at the present day.

The Worm in the Eye of the Horse.—This singular phenomenon has attracted some attention among naturalists and others in our city. A scientific friend, who has examined it, has favored us with the following description of the species to which the worm in question is supposed to belong:

The common name of it is, "Guinea Worm;" the scientific names are several in number, but the most approved is, probably, *Filaria Medinensis*. The body of the worm is round, elastic, elongated, and of nearly equal thickness throughout. It is of a white color, about the thickness of the string of a violin, and of various length as described by authors. The specimen in the horse now in this city is supposed to be nearly three inches long, and it is becoming longer daily. It is never still, but moves about constantly with a twining motion. This species of worm is sometimes found in the human body. Dr. Joy, of Dublin, in an article on worms, says: "It has been met with in almost all the superficial situations of the body,—in the walls of the abdomen and chest; in the arms and hands; about the neck and head; and even under the conjunctiva, or deep in the socket of the eye; from all of which situations it has been successfully extracted. In a certain species of ape a similar worm has been found within the peritoneal cavity, and in another between the coats of the stomach. It has been discovered in the abdomen of the horse also, and even in the globe of the eye itself, where it has been clearly seen through the transparent humors."

In cases such as that under notice, at present, the inquiry is natural how does the worm get in the eye of the horse?—There are various opinions among the scientific on this question. Some writers suppose that the worm is the larva of an insect deposited in the eye, by the insect penetrating the eye. Others think that it makes its way into the body by the mouth, in food or drink; and then creeps away to a congenial nesting place. Bremser, a celebrated writer on worms, is of opinion that the Filaria is a creature of which the natural abode is the animal body, where, and where alone, it originates and multiplies.—*Baltimore American*.

Don't be afraid if misfortune stalks into your humble habitation. She sometimes takes the liberty of walking into the presence chamber of kings.

An old man when dangerously sick was urged to take advice of the physician, but objected, saying "he wished to die a natural death."

BATTER CAKE.—The following is by a lady; "one pint of cream, one pint of sour milk or buttermilk, 4 eggs, a teaspoonful of salt, salaratus sufficient to destroy the acidity of the milk, and three pints of sifted flour, or enough to make a stiff batter. Stir the articles well together, and bake in a deep dish. To be eaten hot with butter."

TREASURER'S SALE.
PIKE COUNTY TAXES.

NOTICE IS HEREBY GIVEN, that agreeably to an Act of General Assembly of the Commonwealth of Pennsylvania, passed the 13th of March, 1815, entitled "An act to amend the act entitled an act directing the mode of selling unseated lands for taxes and for other purposes" and of an act passed the 13th of March, 1817, "A further supplement to an act to amend the act entitled an act directing the mode of selling unseated lands for taxes and for other purposes"—the following tracts of land will be sold at Public Vendue, on the second Monday of June next, at the Court House in Milford, in the county of Pike, for arrearages of taxes due, and the cost accrued on each lot respectively.
